

# What's Hot?

Welcome to our products page, full of hot products you should know about to help with the business of property investing

Overton Outdoor Furniture are manufacturers of quality outdoor furniture

Having a New Zealand manufacturer that's been around for over 30 years allows the customer a certain satisfaction that they are dealing with a well respected company that can work with them to help create stylish contemporary extensions of their outdoor living area. The setting shown is our Supreme Riverstone Inlay with the beauty and durability of Hokitika Riverstone Mats inserted into the table to provide not only a functional surface for hot dishes but also blends perfectly with the surrounding area. Overton are offering a special price of \$2,660 incl GST for a set of table and two benches

## Too beautiful to believe it's real

That's what we said when we designed and manufactured our first Sola side post umbrella. When our customers saw this stunning patio umbrella for the first time, it also took their breath away. Technically refined, this rotating and tilting residential side post umbrella has an elegant look with a sporty, nautical flair. It's the perfect choice to complement your pool, deck or patio setting. Without a doubt, the Sola is the most stylish and long-lasting residential side post umbrella on the market today.

## Save water, energy and time

20,000 litres of fresh water go down the drain each year while you wait for hot water to arrive at your taps! Activated by motion sensor or manual switch, the ACT D'MAND® pump draws hot water to your tap before you use it, and returns the unused water back to your water storage system – no need for extra pipe work or additional water heating devices. You will save water, energy and time with hot water being available at your tap at a fraction of the time it once took. No need to install another water heating unit in your home to solve this wasteful and inconvenient problem! Learn more about the innovation behind the award winning ACT D'MAND® Pump System and how easy it is to install in your existing or new home.

## New grow beds

The easy, hassle free way to provide tenants with a vegetable or herb garden. This is a highly effective way of growing most vegetables. The heat absorbing panels promote early growth as the soil will warm up faster. Very easy to assemble and use. No digging required. 230 litre capacity. A great way to allow tenants to have a small vegetable or herb garden so they don't need to dig up the lawn.

NZ Property Investor price \$99.99 plus freight
